

About the Digital Arts Minor

The Digital Arts Minor was created in 2006 as part of the Computer Science Department at Dartmouth. Students come from across campus and take courses in computer modeling, animation, programming for interactive digital arts and courses in Studio Art, Film and Media Studies and Theater.

Work shown tonight was created by students in three introductory courses.

Immediately following the screening, current students and alumnae will answer questions. Please stay seated if you'd like to participate.
